### **Free Visitor Testing Program Extended Through January 31**

**JACKSON, WY**– In response to the success of the free Visitor COVID 19 Test program initiated in December, **the program will now supply COVID-19 tests to visitors to Wyoming through January of 2021.**

Hotels and other resort and hospitality industries can notify guests before arrival; they can preorder a VAULT test and send it to their lodging (a WY address). The program will enable the guest to test while in place and receive their results to mitigate quarantine or other limitations being implemented across the country when they return home.

"We know visitors have been using the program and, as such, can come on vacation and contribute to our communities' economic wellbeing. The program is a means to keep residents and visitors safe. This program is not affecting the availability of tests for Wyoming employees and residents," commented Anna Olson, Jackson Hole Chamber of Commerce President/CEO.

VAULT tests provide the opportunity of testing in the convenience of the guest's lodging, on any schedule. All test results are sent directly to the guest and Teton County Public Health Office. If the test result is positive, guests who receive a positive test result in Wyoming will need to follow the statewide ordinance requiring an in-state quarantine. The guest will be responsible for all costs associated with this additional stay. Guests who receive a positive test result (who showed no symptoms) and have already returned home (outside of Wyoming) agree to assist local public health officials with contact tracing work for their time in Wyoming.

If a guest is feeling ill with flu-like symptoms, St. John's Health can evaluate on their nurse hotline line and via a telehealth visit with one of their providers. St. John's will then determine if the guest needs a coronavirus test, and they will deliver instructions for tests by appointment at one of their testing locations. Call 307-739-4898, option 3.

This program was conceived and delivered in collaboration with Jackson Hole Chamber of Commerce, St. John's Health, Teton County Public Health, Wyoming Office of Tourism, and the Wyoming Governor's office. For more information on VAULT testing, click [here](#).
