

Join us at our newly expanded holistic healthcare practice.

Our mission is to provide the citizens of Jackson, WY and visitors to the area a means of maintaining their incredible active lifestyle. As chiropractors we serve as primary care physicians, with specific interest in the treatment of musculoskeletal injuries, so that our clients can bike harder, run farther, ski longer, shred deeper and climb higher.

In addition to the latest treatment techniques and modalities, we focus intensively on patient education. Our distinguishing goal is to build each patient a “toolbox”, which they can carry with them for the rest of their lives. We want our clients to spend more time doing what they love and less time in our office.

Here is what we see you being involved in:

#### Chiropractic assistant work

- Setting up therapies such as interferential muscular stimulation, ice packs and heat
- Providing muscle work or myofascial release to affected tissues
- Stretching, using Post Isometric Relaxation and Contract-Relax Agonist Contract (CRAC)

#### Light office work

- Check in and out patients
- Answer phone, booking appropriate appointments and collecting pertinent information on issue

#### Exercise and Rehab

- Demonstrating patient exercises and rehab instructions
- Create exercise packets for patients
- Create mobility routines for sports teams. We sponsor the JH Juggernauts Roller Derby team

#### Additional Opportunities

- Learn medical coding. We don't bill insurance but we do provide superbills upon request with CPT codes and ICD-10 codes.
- Expand knowledge of anatomy, physiology and exercise prescription
- Understand HIPAA compliance
- Work with us on business and marketing

We would love someone with an exercise science or pre-med background. A certified personal trainer would be a plus.

#### Flexible hours. We are open

- Monday, Wednesday, Friday 8-5 PM
- Tuesday & Thursday 1:30-6 PM

- Saturdays by appointment
